

i travel daily with my job. My XM Satellite radio keeps me informed of both weather and traffic conditions. Much of my travel is in rural area, often without radio coverage of any type... but my XM radio is always there! I find it invaluable in my work life.

Since I pay for this service, i do not feel that another group -- the National Association of Broadcasters should dictate what I listen to. Please reject the NAB's petition #04-160. PLEASE let me listen to the information I need in order to do my job as efficiently and safely as possible.

Thank you!

Joseph Benenati
